Sheet Glass

WALIA GLOBAL VENTURES

Sheet Glass

Description

Sheet glass is a clear transparent glass which has a smooth surface that is different from float type due to the lack of tin in its production process, but the applications are similar. Kaveh sheet glass, produced by Libbey Owens process, is the result of a continuous and vertical draw of the molten glass with a certain thickness and both surfaces finished by flame.

Features

- Excellent light transmittance and visibility
- Flat and smooth surface
- Easy to be cut, bent and beveled
- Able to be cut in standard sizes based on customer's need

Applications

Sheet glass is used for skylights, glass tables, greenhouse, laboratory tools, picture frame, antique glass, glassware, mirror works, watch and clock glass as well as interior and exterior façade of commercial - residential buildings.

Quality Standards

Top quality glass complies with Europe standard BS EN 572-4 and ISI mark as per indian standard.
